ARIEL DEYA Aspiring Java Developer | Software Developer

Phone: 0745977406
Email: arieldeya2020@gmail.com
Location: Kenya
GitHub: https://github.com/arieldeya

PROFESSIONAL PROFILE

Motivated Information Technology student at Kisii University with a strong interest in Java programming, backend development, and database management. Experienced in developing academic and personal software projects using Java, Spring Boot, Python, Flask, machine learning, and relational databases.

Passionate about solving real-world problems through technology, building practical applications, and continuously improving software development skills. Combines technical learning with three years of karate training and participation in multiple competitions, demonstrating commitment to continuous practice and personal development.

TECHNICAL SKILLS Programming Languages

- Java
- Python
- JavaScript
- HTML5 and CSS3

Backend Development

- Spring Boot
- Flask
- REST API development
- Model-View-Controller (MVC) concepts **Database Management**
- MySQL
- MariaDB
- MongoDB

Development Tools

- Git and GitHub
- Apache Maven

- Visual Studio Code
- Eclipse
- Spring Tool Suite

Machine Learning

- Scikit-learn
- Pandas
- Random Forest classification
- Data preprocessing and model evaluation

EDUCATION Bachelor of Science in Information Technology Kisii University, Kenya

Period: 2021–2027 **Expected**

Graduation: 2027 Relevant

areas of study:

- Programming and software development
- Database management systems
- Artificial intelligence
- Machine learning
- Human-computer interaction
- Software engineering

Kenya Certificate of Secondary Education (KCSE) St Alloy's Gem Secondary School Period: 2016–2019 **Grade:** C+ **TECHNICAL PROJECTS**

1. Bookstore Management System

Technologies: Java, Spring Boot, MariaDB, Thymeleaf

- Developed a web-based bookstore application to practise backend development and database integration.
- Implemented CRUD operations for managing application data.
- Worked with Spring Boot to develop application functionality.
- Used Thymeleaf to connect backend functionality with web pages.

GitHub: https://github.com/arieldeya/bookstoredb

2. Phishing Detection System

Technologies: Python, Machine Learning, Scikit-learn, Random Forest, Flask

- Worked on a machine learning system for classifying URLs as potentially legitimate or malicious.
- Used URL features and a phishing dataset to support model training and evaluation.
- Applied data preprocessing and machine learning techniques.
- Worked on integrating prediction functionality into a web application.

GitHub: https://github.com/arieldeya/PhishingDetection

3. Heart Disease Prediction System

Technologies: Python, Machine Learning, Flask, Pandas, Scikit-learn

- Developed a machine learning project focused on predicting heart disease using health-related data.
- Performed data cleaning, preprocessing, and feature preparation.
- Trained and evaluated a classification model.
- Worked on integrating prediction functionality into a web application.

GitHub: https://github.com/arieldeya/heart

ADDITIONAL TRAINING AND ACTIVITIES Karate Training

Institution: Kisii University
Training Duration: 3 years

Current Belt: White Belt
Status: Currently training

- Participate in ongoing karate training at Kisii University.
- Have participated in multiple karate competitions.
- Continue developing martial arts skills through regular training and competition experience.

PERSONAL STRENGTHS

- Analytical thinking and problem-solving
- Persistence in debugging and improving software
- Independent learning and practical project development

- Commitment to continuous learning
- Discipline and dedication through karate training
- Willingness to collaborate and learn from others

CAREER OBJECTIVE

To secure an internship, industrial attachment, or junior software development opportunity where I can apply my Information Technology knowledge, strengthen my Java and Spring Boot expertise, contribute to practical software projects, and grow into a competent professional software developer.
